Trend Micro® Security Suite is an easy-to-use, comprehensive security solution that keeps out hackers, viruses, worms, fraudulent emails and other threats. It uses award-winning firewall technology from Trend Micro, and includes antivirus, phishing & spam protection, Web site filtering, privacy protection, instant messaging security, and more.

Key Features Include:

- Easy-to-use firewall blocks hackers and other unknown threats.
- Stops viruses and worms, and protects against emerging viruses before they attack.
- Protects against identity theft and online profiling.
- Quarantines suspicious email attachments and blocks outbound messages containing potential viruses.
- Protects users of the most popular IM services and shields you from IM spammers, thieves, and online predators. Blocks access to offensive Web site content.
- Anti-Phishing & Spam Blocker automatically stop dangerous phishing emails and spam from getting into your inbox. Plus, they constantly adapt to the ever-changing techniques of professional spammers—protecting you against the latest "phishing" schemes.
- Automatically secures PCs connected to wireless networks—at home or on the road.

System Requirements:

- Windows 2000/XP:
  o Pentium III 450 MHz or higher
  o Minimum system RAM: 128 MB
- Windows Vista (32-bit):
  o Pentium III 800 MHz or higher
  o Minimum system RAM: 512 MB
- 50 MB of available hard disk space.
- Internet access.
- Supported protocols for email scanning: POP3 and IMAP4 for incoming; SMTP for outgoing.

Click this button to start the download.

TREND MICRO

Download

Click the download button to the left to begin your download of the software. You will be taken to a page that displays your user registration number. Please make a note of it for future reference.

4. Be sure to record the Product Registration/Serial Number. You will need this number to install the software on your PC.

Trend Micro Reg/Serial Number: _____-_____-_____-_____-_____

5. Click on the Download Now icon to begin downloading software.

6. Click on the Run button at the Internet Explorer – Security Warning prompt, then click on the Run button again at the File Downloading – Security Warning prompt to start downloading.

7. Download will take up to 10 minutes with Chesnee Communications High-Speed Internet; with Chesnee Dial-Up it may take a few hours. If you are using dial-up, make sure that the connection does not drop during the download. Once download is complete, restart your computer and follow the Trend Micro Internet Security Suite – Install Wizard which will guide you through the installation process.

8. Please read and click on "I accept the terms in the license agreement." Click on the Next button.

9. Enter your Trend Micro Reg/Serial Number from step 4; click on the Next button.

10. Select which features you want to install – full installation is recommended. Select the folder in which install it, click on the Next button.

11. Change any default Optional Online Services or simply click on the Install button. Please wait a few minutes while the setup program installs Trend Micro Internet Security Suite. Once installation is complete you must restart your computer for settings to take effect.

12. Click on the Finish button. Save any open files and close all programs and restart your computer. After your computer has restarted, you will see the Trend Micro Internet Icon. To configure the protection status, register your subscription, update and scan your computer.

13. Once your subscription has been registered you will receive a confirmation e-mail from TMOS_reg@trendmicro.com. Please do not reply to this e-mail, but keep this information in a secure place for further reference. This information helps our Technical Support Team provide you with assistance, which you can access 24 hours a day, 7 days a week at 461-2200 or (toll free) 888-375-1553.
